Navdeep Tekula

+91-8919900149 — tekulanavdeep@gmail.com — LinkedIn — GitHub

Profile

Computer Science undergraduate with strong academic performance and a focus on building practical and unique software systems that address real-world challenges. Currently gaining hands-on experience in modern web technologies through a virtual internship with IIT Ropar. Contributor to the Smart India Hackathon 2025 winning project, where I helped develop core features of a mobile platform improving access to educational resources in low-connectivity regions. Interested in frontend and backend engineering, scalable systems, and technology-driven solutions.

Education

Chaitanya Bharathi Institute of Technology, Hyderabad
B.E. Computer Science and Engineering — 2024 – Present
CGPA: **9.78 / 10.0**

Sri Chaitanya Junior College, Telangana
Intermediate (MPC) — 2022 – 2024
Score: **978 / 1000**

Secondary School Certificate — 2022
GPA: **10.0 / 10.0**

Core Computer Science Coursework

Programming

- Object-Oriented Programming (C++ / Java)
- Programming using C, Python

Algorithms and Theory

- Data Structures and Algorithms
- Theory of Computation

Computer Systems

- Computer Architecture
- Digital Logic Design

Databases

- Database Management Systems

Technical Skills

Programming Languages: C, C++, Java, Python
Web Technologies: HTML, CSS, JavaScript, TypeScript
Frameworks / Platforms: Firebase, MERN Stack (MongoDB, Express.js, React.js, Node.js)
Development Tools: Git, GitHub, Visual Studio Code

Experience

Virtual Internship – MERN Stack with TypeScript
Indian Institute of Technology Ropar — Jan 2026 – Present

- Developing full-stack applications using MERN stack and TypeScript.
- Designing RESTful APIs with Node.js and Express.
- Building responsive frontend interfaces using React.
- Integrating MongoDB for efficient data storage.
- Applying modular architecture and collaborative Git workflows.

Projects

VignanaSarathi – Smart India Hackathon 2025 Winning Project

Problem: Improving access to educational resources in rural regions with limited connectivity.

Approach

- Built a mobile-first platform optimized for low-bandwidth environments.
- Enabled teacher–student collaboration with real-time synchronization.

Tech Stack: Flutter, Firebase, Cloud Firestore, Agora, Android Studio

Impact

- Expands accessibility of digital learning resources in rural regions.
- Demonstrates technology-driven solutions for educational inclusion.

Smart Mobile Konnect

Overview: Cross-platform system connecting **Windows and Android devices** to create a unified personal ecosystem.

Key Features

- Real-time clipboard and file sharing between devices.
- Live Android notification access on Windows.
- Remote access to Android apps running as separate Windows processes.

Tech Stack: React, Android APIs, WebSocket-based communication, Git

Impact

- Improves productivity and cross-device workflow.
- Enables seamless integration of personal devices.

Positions of Responsibility

Developer – VignanaSarathi Project (Smart India Hackathon 2025)

- Contributed to development of a mobile platform enabling teacher–student collaboration.
- Implemented Slide Sharing, a unique feature of the application, and also assisted in features like image clarity enhancement.
- Assisted in designing architecture optimized for low-bandwidth environments.

Achievements

- Winner – Smart India Hackathon (Software Edition) 2025 — SIH25101
- CGPA: **9.78 / 10.0** in B.E. Computer Science and Engineering
- GPA: **10.0 / 10.0** in Secondary School Certificate

Areas of Interest

- Data Structures and Algorithms
- Backend Engineering
- Distributed Systems
- Scalable Software Systems
- Technology for Education

Languages Spoken

- English — Professional Proficiency
- Hindi — Professional Proficiency
- Telugu — Native Proficiency
